Declaration regarding plagiarism

I assure that in the preparation of my thesis I will follow the principles described below.

These principles comprise:

- autonomous preparation of the thesis;
- specification of all aids used throughout the thesis;
- precise documentation of the scientific approach and obtained results;¹
- indication of all the sections of the text which were taken, in words or analogously, from published or unpublished sources.

I am aware that it is **not** allowed:

- to intentionally or carelessly falsify the information;²
- to adopt parts of the text of other authors or translate foreign language texts without any indication of that;
- to take a piece of text from other sources and substitute words or phrases with other words or phrases in such a way that the sources are not identifiable, without providing an appropriate reference;
- to adopt the structure of some other work without indicating this.

I hereby declare that I have read the description above regarding plagiarism and appropriate use of sources, understood it and clarified all the uncertainties with my academic supervisor. I am aware that my scientific work will be graded as "failed" in case it totally or partly represents plagiarism.

Magdeburg,

Signature

¹ Especially if the work contains empirical analysis.

² This concerns inventing and falsifying the data as well as extracting undesirable results.
